### ABOUT ME

---

**Senior Full Stack Engineer** driving technical leadership and architectural innovation within critical financial and insurance enterprise ecosystems. Proven track record in designing .NET architectures, implementing distributed integrations, and delivering complex, enterprise-grade full-stack applications. Recognized for ensuring system stability, performance, and robust governance. Pivoting a strong engineering foundation to design and deliver high-impact, automated AI solutions.

### KEY COMPETENCIES

- **Communication:** Translating complex user requirements into scalable business logic.
- **Problem Solving:** Rapid incident and root cause troubleshooting, performance optimization, and feasibility analysis.
- **Team Support:** Strategic technical mentorship, and architectural and code guidance to ensure quality delivery.

---

### TECHNICAL SKILLS

---

#### Software Development & Architecture

- **Core Engineering:** Backend Architecture Design, System Integration, Legacy Modernization, Performance Tuning, Security Governance (CheckMarx), CI/CD (Jenkins, Rancher), Microservices Architecture.
- **Frameworks:** .NET Core MVC, .NET MVC, ASP.NET Web Forms, Win Forms, WPF (XAML).
- **APIs & Services:** RESTful API (ASP.NET Web API), SOAP, WCF, RabbitMQ queuing , Hangfire

#### Database Management

- **Systems:** Microsoft SQL Server, MySQL, Oracle, MariaDb ,Dbeaver
- **Specialties:** Advanced Stored Procedures, Performance Tuning, Index Optimization, Database Design, Data Mapping & Validation.

### AI & Modern Tools

- AI Integration: Generative AI Integration (OpenAI/Gemini/Claude), Prompt Engineering, AI-Driven Workflows for Frontend Prototyping and Code Refactoring.
- Modern Tools: Git (GitLab, GitHub, SourceTree), Entity Framework, Docker, SonarQube, Rancher, IIS.

### Report & Testing

- **Report:** SSRS, Crystal Reports, ReportView.
- **Testing:** SoapUI, Postman, JMeter, Test Case Design.

---

## PROFESSIONAL EXPERIENCE

---

**R Systems Consulting Services (Bangkok, Thailand) | On Site: Krungthai AXA Life**  
**Full Stack Engineer | July 2026 – Present**

- **Impact:** Architected a high-volume claim image migration platform using a queued document processing design, ensuring scalability, reliability, and automated production recovery for Krungthai AXA Life
- **Key Achievement:**
  - Designed a distributed orchestration system separating web orchestration, PDF compression, and CMX API delivery into independent processes, increasing claim processing throughput by [X]%.
  - Implemented job/queue status workflows supporting resumable sending, allowing interrupted jobs to continue without reprocessing completed files, saving estimated [X] staff hours per month.
  - Optimized SQL stored procedures for atomic queue handling, preventing duplicate uploads and maintaining 100% data integrity.

**Chubb Samaggi Insurance | Bangkok, Thailand**  
**Full Stack Engineer | April 2024 – March 2026**

- **Impact:** Strengthened production system robustness and reduced manual agent verification time through automation and modernization.
- **Key Achievement:**
  - Incident Commander: Acted as primary lead for resolving critical production incidents, serving as strategic liaison between Business Users, Infrastructure, and multiple departments (Renewal, Financial, Underwriting) for root cause analysis and service restoration.
  - Modernization: Enhanced the I-Prompt system to support KBANK 2C2P complex installment payment logic for new/renewal policies and advanced "Driver Level" specifications.
  - Automation: Engineered an automated Due Diligence System for online agent onboarding, streamlining document management and questionnaires.
  - Partner Integration: Developed scalable Print Service APIs for seamless integration with external business partners.

**Cigna Insurance Public Company Limited** | Bangkok, Thailand  
**Full Stack Developer** | April 2019 – April 2024

- **Impact:** Enhanced claims automation and customer retention by designing and implementing critical system automations and integration layers.
- **Key Achievement:**
  - **Microservices:** Designed and implemented a scalable SMS Service API with manage-queued delivery for high-volume reliable messaging.
  - **Claims Automation:** Developed C# Batch Jobs automating "No Claim Bonus" (NCB) logic, improving retention by accurately identifying eligible rewards.
  - **System Integration:** Took direct ownership of the critical daily claim interface (DHIP) with Dhipaya Insurance, proactively resolving batch failures and ensuring high data integrity.
  - **Policy Issuance Optimization:** Revamped the "ECorr" policy printing process, integrating core system data with complex logic via PlanetPress for an automated document generation lifecycle.

**THAI INSURERS DATANET CO., LTD.** | Bangkok, Thailand **Application Developer** |  
 June 2016 – April 2019

- **Impact:** Delivered actionable data analytics tools and optimized central databases for industry-wide data consistency.

- **Key Achievement:**

- Developed the **RVP Dashboard** to visualize critical KPIs (accident statistics, sales performance, claims ratios) for executive decision-making.
- Managed the IFA central database, optimizing queries for high-volume policies and claims history.
- Implemented rigorous data mapping and validation (System & Business Validation) for industry-wide compliance.

**FREEWILL SOLUTIONS** | Bangkok, Thailand

**Consultant / Application Developer** | March 2015 – May 2016

- Developed management claim platform for international/domestic shipping insurance (CPIO).
- Engineered reporting subsystem for operational insights (Bisimo equipment maintenance) utilizing SQL Server and Crystal Reports.

**GREENLINE SYNERGY (BDMS Group)** | Bangkok, Thailand

**Application Developer** | 2013 – 2015

- Provided Tier-2 support and system upgrades for the "B-Connect" Hospital Information System (HIS).
- Developed interfaces connecting HIS with BJC PACS to automate automatic retrieve result for X-Ray result.

---

**SELECTED SPECIALIZED PROJECTS (Freelance)**

---

**Wise Exchange (Currency Exchange Platform)** *Role: Lead Developer*

- **AI-Driven Development:** Concepted and engineered a decoupled architecture (Web API + Angular). Successfully utilized **Generative AI and Prompt Engineering** to bridge technical gaps in Angular, significantly accelerating frontend development and reducing technical barriers.

**Happy Rich System (Web Application , Win Application )** | Lead Developer

- **Comprehensive Financial Ecosystem:** Engineered a robust multi-platform solution comprising a high-performance WPF application for tellers and a centralized web-based administrative portal. Orchestrated critical foreign exchange workflows, including live rate displays, automated End-of-Day closing, and comprehensive administrative control panel

**GOLD SHOP MANAGEMENT SYSTEM (Web Application)** *Role: Full-SDLC & Product Lead*

- **End-to-End Solutions:** Architected and engineered a full-enterprise Gold Retail Management system, migrating legacy WinForms to a modern, multi-branch Dockerized .NET Core ecosystem with core accounting.
- **Complex Business Logic:** Engineered complex financial logic (Gold Consignment/Pawnbroking with interest, Gold Savings with price locking, KYC/Smart Card/Passport scanner integration).

**IBS Insurance Reporting (OIC Compliance)** *Role: Team Lead & Crisis Manager*

- **Crisis Intervention:** Assumed technical leadership for a failing 4-person team amidst severe performance issues and strained relations. Restored client trust through proactive communication and personally verified intricate Oracle queries/data output for all 50 complex regulatory reports to guarantee 100% data accuracy.

**XMS (Exchange Management System):** Developed a specialized inventory management system for foreign currency exchange businesses, ensuring accurate real-time stock tracking and transaction balancing.

**Doctor Schedule System:** Designed & Develop fixed bug a workforce management solution to optimize physician shift scheduling and automate leave management

---

**EDUCATION**

---

**Kasetsart University, Thailand** Bachelor of Science in Computer Science | Graduated May 2013
